Amendments to the Claims:

Claims 1-33 (Canceled)

34. (New) A denture adhesive removal system comprising (a) a solvent composition comprising at least one oil-based solvent; a thickener; and a surfactant; and (b) an applicator, wherein the applicator comprises a flexible substrate that is pre-moistened with the solvent composition.

35. (New) The denture adhesive removal system of claim 34, wherein the oil-based solvent is selected from the group consisting of mineral oil, vegetable oil, D-limonene, glycerin, cottonseed oil, sesame oil, propylene glycol and mixtures thereof.

36. (New) The denture adhesive removal system of claim 34, wherein the oil-based solvent is mineral oil.

37. (New) The denture adhesive removal system of claim 34, wherein the mineral oil is present from 1% to 90%, by weight of the composition.

38. (New) The denture adhesive removal system of claim 34, wherein the oil-based solvent is a mixture of mineral oil and vegetable oil.

39. (New) The denture adhesive removal system of claim 38, wherein the mineral oil is present from 1% to 90% and the vegetable oil is present from 1% to 30%, by weight of the composition.

40. (New) The denture adhesive removal system of claim 34, wherein the surfactant is present from 0.1% to 15%, by weight of the composition.

41. (New) The denture adhesive removal system of claim 40, wherein the surfactant is sodium lauryl sulfate.

42. (New) The denture adhesive removal system of claim 34, wherein the thickener is present from 1% to 50%, by weight of the composition.

Serial No.: 10/572,969
Group Art Unit No.: 1796

43. (New) The denture adhesive removal system of claim 42, wherein the thickener is silicon dioxide.
44. (New) The denture adhesive removal system of claim 37 further comprising from 1% to 50% of water.
45. (New) The denture adhesive removal system of claim 34 further comprising a flavorant from 0.1% to 10% by weight of the composition.
46. (New) The denture adhesive removal system of claim 34 further comprising at least one optional ingredient selected from the group consisting of anti-calculus agents; anti-caries agents such as fluoride ion sources; stannous ion sources; tooth whitening agents; breath fresheners; anti-microbial agents; anti-plaque agents; anti-inflammatory agents; nutrients; antioxidants; anti-bacterial agents; anti-fungal agents; analgesic agents; local anesthetic agents; antihistamines; disinfectants; vasoconstrictors; hemostatics; chemotherapeutics; antibiotics; tooth desensitizing agents; antifungals; vasodilators; antihypertensives; antiemetics; antimigraine; antiarrhythmics; antiasthmatics; antidepressants; vaccines; peptides or prodrugs; hormones; proton pump inhibitors; H2 receptor antagonists; fragrances; sensates; pigments; dyes; lakes; colorants; and mixtures thereof.
47. (New) A denture adhesive removal system comprising (a) a solvent composition comprising from 1% to 90% mineral oil; from 1% to 30% of a second oil-based solvent; from 0.1% to 50% of a thickener; and from 0.1% to 15% of a surfactant; and (b) an applicator, wherein the applicator comprises a flexible substrate that is pre-moistened with the solvent composition.
48. (New) The denture adhesive removal system of claim 47 further comprising a flavorant from 0.1% to 10% by weight of the composition.
49. (New) The denture adhesive removal system of claim 48 wherein the second oil-based solvent is selected from the group consisting of vegetable oil, D-limonene, glycerin, cottonseed oil, sesame oil, propylene glycol, water and mixtures thereof.
50. (New) The denture adhesive removal system of claim 49 wherein the second oil-based solvent is vegetable oil.

Serial No.: 10/572,969
Group Art Unit No.: 1796

51. (New) The denture adhesive removal system of claim 47 wherein the surfactant is sodium lauryl sulfate.
52. (New) The denture adhesive removal system of claim 47 wherein the thickener is silicon dioxide.
53. (New) The denture adhesive removal system of claim 47 further comprising at least one optional ingredient selected from the group consisting of anti-calculus agents; anti-caries agents such as fluoride ion sources; stannous ion sources; tooth whitening agents; breath fresheners; anti-microbial agents; anti-plaque agents; anti-inflammatory agents; nutrients; antioxidants; anti-bacterial agents; anti-fungal agents; analgesic agents; local anesthetic agents; antihistamines; disinfectants; vasoconstrictors; hemostatics; chemotherapeutics; antibiotics; tooth desensitizing agents; antifungals; vasodilators; antihypertensives; antiemetics; antimigraine; antiarrhythmics; antiasthmatics; antidepressants; vaccines; peptides or prodrugs; hormones; proton pump inhibitors; H₂ receptor antagonists; fragrances; sensates; pigments; dyes; lakes; colorants; and mixtures thereof.
54. (New) A method of removing denture adhesive and denture adhesive residue from a denture or from any natural surface of the oral cavity of an individual by wiping said denture or said oral cavity surface with a wipe comprising a flexible substrate that is pre-moistened with a denture adhesive solvent composition comprising at least one oil-based solvent; a thickener; and a surfactant.
55. (New) A kit comprising:
a.) a denture adhesive solvent composition;
b.) an applicator; and
c.) instructions for use.
56. (New) A kit comprising (a) the denture adhesive removal system of claim 34; and (b) instructions for use.
57. (New) A kit comprising (a) the denture adhesive removal system of claim 47; and (b) instructions for use.
